The yellow highlights should match up with the questions I have about the data – they represent the data gaps identified in my email last Friday. The bold values are the ones that exceed the AWQC-HH for total PCBs. I italicized the ND values to distinguish them from the detected values.

Hi Kristine.

We are working through your questions on the SW data for today's meeting. Can you tell us what the yellow highlighted cells and the bolded and italicized fonts signify on the PCB data spreadsheet?

Thanks and see you at 3 pm.

Gene

Jim and Gene – attached is a spreadsheet with the PCB data I was able to glean out of the database and data reports for tomorrow's discussion.
